

MATHEW ROSS

Toronto, Ontario | 416-918-1834 | mathew.d.ross@gmail.com | <https://www.mdrtech.ca>

PROFESSIONAL SUMMARY

Infrastructure and cloud administrator with over 15 years of experience supporting enterprise environments across both on-prem and cloud platforms. Strong within the Microsoft stack, including Azure, Windows Server and Active Directory, with a focus on IaC and automation using Terraform and PowerShell. Recently led an MECM deployment and Active Directory remediation work that helped move day-to-day operations away from reactive support and toward ITIL-aligned operations.

EXPERIENCE

MDR Technology Solutions (Oak Valley Health) | Toronto, ON

August 2025 – January 2026

Regional healthcare provider supporting critical patient care facilities and compliance-heavy infrastructure

Senior Systems Administrator (Contract)

- Responsible for remediating Active Directory and Group Policy while deploying endpoint management capabilities to meet security and compliance standards
- Led the deployment of MECM to manage over 2,700 Windows endpoints, establishing a standardized hardware and OS management lifecycle
- Developed PowerShell scripts to automate the remediation of 40 OUs and over 200 GPOs, reducing configuration drift in Active Directory
- Managed the upgrade of Exchange Server 2019 to Subscription Edition in a DAG environment, completing the work with zero downtime

Dentsu Canada Inc. | Toronto, ON

Global media and digital marketing communications network requiring high-availability cloud and on-premise enterprise infrastructure

Cloud Administrator

May 2022 - July 2025

- Responsible for acting as the senior technical escalation point for infrastructure and endpoint incidents, maintaining stability and readiness across the Americas region
- Optimized Azure infrastructure for performance and cost-efficiency, reducing departmental spend by 60% while maintaining strict service availability
- Implemented cloud security best practices and modernized Windows Server workloads, decreasing vulnerability exposure by 71%
- Designed a secure file transfer solution using AWS Transfer Family to replace the end-of-life Axway Interchange, saving \$70,000 compared to renewing Axway

System Support Engineer

June 2018 - May 2022

- Responsible for managing enterprise end-user, desktop, and application services across Canada, maintaining operational continuity for 1,000+ users across core business functions
- Led a team of five support specialists, providing guidance and improving ticket resolution performance to 24% above the regional average
- Reduced SLA breaches by 50% by improving responsiveness and service consistency across desktop and infrastructure support

- Administered 10+ servers along with identity and application services, resolving incident and change-related issues to maintain reliable day-to-day operations

System Support Specialist

January 2011 - June 2018

- Responsible for delivering endpoint and workplace technology support across Canada, maintaining service continuity for end users
- Supported administration of Active Directory, Exchange mailboxes, and SCCM, helping maintain user, device, and messaging services
- Delivered enterprise technical support to 800+ end users, including account lifecycle support, device provisioning, documentation, and incident resolution
