SYSTEMS AND CLOUD ADMINISTRATOR

A solution-driven professional with 15+ years of experience supporting enterprise IT environments across on-premises and cloud platforms. Strong background in Windows infrastructure, Azure, and Microsoft 365. Known for a hands-on approach to building stable operating environments and working with stakeholders to deliver secure, cost-effective infrastructure solutions.

SKILLS

Infrastructure & Systems: Windows Server, Active Directory, Exchange Server (2019 / Subscription Edition), Microsoft 365, Intune, MECM / SCCM

Cloud Platforms: Azure, AWS, Hybrid cloud architecture, Azure CAF / WAF principles

Automation: PowerShell, Terraform

Operations: ITIL, ServiceNow, Patch Management, Vulnerability Remediation, Log Analysis, RCA

EXPERIENCE

MDR Technology Solutions (Oak Valley Health) | Toronto, ON

August 2025 – January 2026

Senior Systems Administrator

- Led Exchange Server 2019 to Subscription Edition migration across a DAG environment, ensuring high availability and production continuity
- Delivered MECM deployment supporting 2,700+ endpoints, strengthening device governance and patch compliance
- Remediated Active Directory and Group Policy across 40 OUs and 200+ GPOs, reducing policy drift and strengthening security posture
- Built PowerShell automation for OU cloning, GPO export/import, and configuration validation to reduce repetitive manual tasks

Dentsu Canada Inc. | Toronto, ON

January 2011 – July 2025

Cloud Administrator

- Optimized Azure environment using governance and cost-control frameworks, reducing spend by 60% while maintaining service availability
- Hardened security posture by migrating legacy workloads to Azure, reducing vulnerability exposure by 71%
- Acted as an escalation point for infrastructure and cloud-related incidents affecting production systems
- Participated in change planning and release coordination to ensure minimal service disruption

System Support Engineer

- Led a team of five support specialists, achieving 24% higher ticket resolution rates than the regional average
- Reduced ticket resolution times by 57% through ServiceNow metrics and process refinement
- Administered identity, server, and application services across enterprise production environments

System Support Specialist II/Specialist

- Reduced SLA breaches by 50% while supporting 800+ enterprise users
- Supported Active Directory, Exchange, and SCCM administration and incident resolution
