PROFESSIONAL SUMMARY

Systems and Cloud Administrator with 15+ years of experience supporting enterprise IT environments across on-premises and cloud platforms. Strong background in Windows infrastructure, identity services, Azure, and Microsoft 365. Known for a hands-on approach to building stable operating environments and working with stakeholders to deliver secure, cost-effective infrastructure solutions.

SKILLS

Infrastructure & Systems: Windows Server, Active Directory, Group Policy, Exchange Server (2019 / Subscription Edition), Microsoft 365, Intune, MECM / SCCM

Cloud Platforms: Azure, AWS, Hybrid cloud architecture, Azure CAF / WAF principles

Operations & Delivery: ITIL-aligned operations, ServiceNow, Incident/change/problem management, Patch Management, Vulnerability Remediation

Automation: PowerShell, Terraform (Foundational)

EXPERIENCE

MDR Technology Solutions (Contract to Oak Valley Health) | Toronto, ON

Senior Systems Administrator (Consultant) | Aug 2025 – Jan 2026

- Led Exchange Server 2019 to Subscription Edition migration within a DAG environment, maintaining high availability and production continuity during upgrade execution
- Delivered enterprise MECM deployment supporting 2,700+ endpoints, improving patch compliance and operational stability
- Remediated Active Directory and Group Policy structure across 40 OUs and 200+ GPOs, reducing policy drift and strengthening security posture
- Built PowerShell automation for OU provisioning, GPO export/import, and configuration validation while supporting broader infrastructure modernization initiatives

Dentsu Canada Inc. | Toronto, ON

Cloud Administrator | May 2022 – July 2025

- Optimized Azure environment using governance and cost-control frameworks, reducing spend by 60% while maintaining service availability
- Migrated and hardened legacy workloads into Azure, reducing vulnerability exposure by 71% across production systems
- Acted as an escalation point for infrastructure incidents, ensuring minimal production disruption
- Participated in change planning and release coordination to ensure minimal service disruption

System Support Engineer | June 2018 – May 2022

- Led a team of five EUC-focused support specialists, achieving 24% higher ticket resolution rates than the regional average
- Reduced resolution time by 57% through ServiceNow analysis and operational optimization
- Administered identity, server, and application services across enterprise production environments
- Supported macOS device management within a JAMF-managed environment, assisting with device enrollment, policy application, and lifecycle support

System Support Specialist II/Specialist | Jan 2011 – June 2018

- Reduced SLA breaches by 50% while supporting 800+ enterprise users
- Supported Active Directory, Exchange, and SCCM administration and incident resolution
