PROFESSIONAL SUMMARY

Systems and Cloud Administrator with over 15 years of experience in enterprise IT operations across both on-premises and cloud environments. With a strong background in Windows, Azure, Microsoft 365, and Active Directory. Utilizes a practical, hands-on methodology to establish stable, low-friction operating environments and collaborates effectively with stakeholders to deliver cost-effective platforms.

EXPERIENCE

MDR Technology Solutions (Contract to Oak Valley Health)

August 2025 - January 2026

Lead Systems Administrator (Consultant)

Toronto, ON

- Architected and led the migration from Exchange Server 2019 to Subscription Edition across a DAG environment, coordinating with stakeholders to ensure high availability and business continuity
- Designed and delivered a scalable Microsoft Endpoint Configuration Manager deployment for over 2,700 endpoints, securing reliable enterprise endpoint management and enabling future cloud integration
- Led Active Directory and Group Policy remediation across 40 OUs and 200 GPOs to ensure security compliance and operational excellence
- Built PowerShell scripting, such as OU cloning, GPO export/import, and configuration analysis, to reduce repeated manual commands
- Led architecture discussions with IT leadership to align infrastructure modernization initiatives with security, resiliency, and long-term cloud strategy

Dentsu Canada Inc.

May 2022 - July 2025

Cloud Administrator

Toronto, ON

- Optimized enterprise Azure environment utilizing WAF principles for Cost Optimization, achieving a 60% reduction in spend through lifecycle policies
- Architected a secure file transfer solution using AWS Transfer Family to replace the end-of-life Axway Interchange, saving \$70,000 compared to renewing Axway
- Hardened security posture by migrating legacy infrastructure to Azure to reduce vulnerability scores by 71%
- Acted as a trusted technical advisor to application, security, and infrastructure teams during cloud migration, modernization, and data platform initiatives

System Support Engineer

June 2018 - May 2022

- Led a team of five IT professionals, developed best practices and maintained consistent collaboration to achieve a 24% higher ticket resolution rate than the Americas region average
- Coached and onboarded new hires, with one team member quickly emerging as Canada's top performer and a leading contributor across the Americas region
- Utilized ServiceNow reporting to track ticket responses and reduce resolution times by 57%
- Performed day-to-day administration of server, identity and application services, and resolved incident and change-related issues

- Reduced SLA breaches by 50% and maintained one of the highest incident-resolution success rates in the region
- Supported administration of Active Directory, Exchange mailboxes and SCCM
- Delivered enterprise technical support to over 800 end users, including AD account lifecycle management, device provisioning, documentation, and incident resolution
